RE: Verizon Wireless Rooftop Facility – Lost Hills AWS
Site Located at: 26791 Agoura Rd, Calabasas, CA 91302

To Whom It May Concern,

We write to inform you that Verizon Wireless has performed a radio frequency (RF) compliance pre-construction evaluation for the above-noted proposed site and based on the result of the evaluation, will be compliant with FCC Guidelines.

The FCC has established safety guidelines relating to potential RF exposure from cell sites. The FCC developed the standards, known as Maximum Permissible Exposure (MPE) limits, in consultation with numerous other federal agencies, including the Environmental Protection Agency, the Food and Drug Administration, and the Occupational Safety and Health Administration. The FCC provides information about the safety of radio frequency (RF) emissions from cell towers on its website at: http://www.fcc.gov/oet/rfsafety/rf-faqs.html

Please refer to the FCC Office of Engineering and Technology Bulletin 65 for information on RF exposure guidelines. Policy questions should be directed to VZWRFCompliance@verizonwireless.com. Contact your local Verizon Wireless resource below if you have additional site-specific questions.
