CITY of CALABASAS

September 2, 2014

SUBJECT: THE LOST HILLS ROAD INTERCHANGE IMPROVEMENT PROJECT UPDATE

Dear Sir/Madame:

The City of Calabasas staff would like to inform you of the **Lost Hills Road Interchange Improvement Project Update** that will be presented at City Council on **Wednesday, September 10, 2014**. City Council begins at 7:00 pm and the presentation is scheduled for 8:15 pm; however, the presentation may start a little earlier or later dependent on the progression of earlier Council agenda items.

The City of Calabasas proposes to replace the existing Lost Hills Road/ U.S. Highway 101 (US-101) overcrossing and modify the interchange. Some of the features for the proposed improvements will include increasing the bridge width from 2 to 5 lanes and reroute the left turn traffic to a loop on-ramp similar to Parkway Calabasas. The new bridge will consist of two bike lanes and a pedestrian sidewalk on the west side of the bridge. The new loop configuration and additional bridge lanes will significantly reduce delays and backups during peak hours. Along with improving the traffic congestion, the bridge will also be widened to allow for the future improvements of Highway 101 to add HOV lanes.

As the City comes closer to the construction phase of these improvements, City staff would like to present to Council and public the progress made since the last update in April 2014, and what to expect in the near future. Some of the presentation topics include the following:

- *Project Overview*
- *Design Completion Status*
- *Project Schedule*
- *Project Aesthetics*

Please distribute this letter to your residents and invite them to attend the City Council meeting or they can tune in to CTV – The Calabasas Channel to watch the presentation from home.

We appreciate the community's participation and look forward to seeing you there.

Sincerely,

Andrew Brozyna, P.E.
Deputy Public Works Director
