Westlake Village, California 91361

Subject: Initial Site Assessment  
Lost Hills Road Interchange  
US-101 Freeway  
Calabasas, California  
EA 07-242300

Dear Mr. Faul:

In accordance with your authorization, Ninyo & Moore has performed an Initial Site Assessment of the subject site in the city of Calabasas in Los Angeles County, California. The purpose of our assessment was to evaluate the likelihood of environmental impacts to soil and groundwater beneath the site, resulting from past and present uses of the site and adjoining properties.

We appreciate the opportunity to be of service to the Huitt-Zollars. If you have any questions regarding this report, please contact the undersigned at your convenience.

Sincerely,  
**NINYO & MOORE**

Beth Padgett  
Senior Staff Environmental Geologist

BAP/JJR/sc/mlc

Distribution: (1) Addressee (via e-mail)

John Jay Roberts, P.G., C.E.G.  
Senior Geologist

Appendix C – Environmental Database Search

Appendix D – Regulatory Records

## **1. INTRODUCTION**

Huitt-Zollars (HZ) has authorized Ninyo & Moore to perform an Initial Site Assessment (ISA) of the interchange area located at Lost Hills Road on United States-101 Freeway (US-101) in the city of Calabasas, California. Residential and commercial properties, as well as vacant land adjoin the site. The approximate location of the site is shown on Figure 1.

### **1.1. Purpose**

The purpose of this ISA was to evaluate the likelihood that hazardous materials may be present in soil or groundwater beneath the site as a result of on-site or off-site activities. To evaluate the likelihood of encountering contamination during construction activities, Ninyo & Moore performed a limited evaluation of properties adjoining the site, with regard to the presence of hazardous materials (the likelihood of specific areas of the site being contaminated was ranked as high, medium, or low).

### **1.2. Involved Parties**

Ms. Beth Padgett of Ninyo & Moore conducted the site reconnaissance and performed interviews and regulatory inquiries. Ms. Krista Brodersen and Mr. John Jay Roberts of Ninyo & Moore performed project oversight and quality review.

### **1.3. Scope of Services**

Ninyo & Moore's scope of services included the following:

- Review of readily available maps and reports pertaining to the site, as provided by the client.
- Performance of a site reconnaissance to visually observe areas of possibly contaminated surficial soil or surface water, improperly stored hazardous materials, possible sources of polychlorinated biphenyls (PCBs), and possible risks of contamination from activities at the site and adjacent properties.
- Review of readily available local regulatory agency files for the site.

- Review of available regulatory agency databases for the site and for properties located within a specified radius of the site. The purpose of this review was to evaluate the possible environmental impact to the site from listings on these databases. These databases list locations of known hazardous waste sites, landfills, leaking underground storage tanks (LUSTs), permitted facilities that contain underground storage tanks (USTs), and facilities that use, store, or dispose of hazardous materials.
- Review of readily available historical documents, including aerial photographs (site and vicinity), historical fire insurance rate maps (available for site and adjacent properties), building department records (site only), and city directories (available for site and adjacent properties), as necessary.
- Preparation of this ISA documenting findings and providing opinions and conclusions regarding possible environmental impacts at the site.

#### **1.4. Limitations and Exceptions**

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report. Please note that this study did not include an evaluation of geotechnical conditions or potential geologic hazards, which may affect the site. In addition, it should be noted that this ISA does not include analysis of the following: asbestos-containing materials, methane gas, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high voltage power lines.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The scope of this evaluation did not include an evaluation of radon levels, lead, or asbestos. Properties adjoining the corridor were visually observed from public rights-of-way only.

Observations were made from readily accessible vantage points. Although reasonable effort was made to view relevant site features, some features may have been concealed. This assessment did not include an evaluation of geologic and hydrologic conditions at the site. Such an evaluation has been prepared by Ninyo & Moore and has been issued under a separate cover.

Our findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced sources and literature. It should be understood that the conditions of a site can change with time as a result of natural processes or the activities of man at the subject site or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control. Ninyo & Moore cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the site. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

## **2. SITE DESCRIPTION**

This section provides a general description of the land uses adjoining the site.

### **2.1. Overview**

The site consists of approximately 3,800 feet of existing US-101, extending from the Lost Hills Road Bridge approximately 2,000 feet to the west and approximately 1,800 feet to the east. The site also includes an area south of the US-101, ranging up to 750 feet and north of the US-101, ranging up to 1,600 feet (Figure 1).

We understand that the project will consist of replacing the Lost Hills Road overcrossing over the US-101 Freeway with a longer and wider overcrossing. The Lost Hills Road over-

crossing, in its current configuration, consists of two lanes (one northbound and one southbound lane). It will be widened to a five-lane bridge. Associated construction will include signal modifications, sidewalk installation, and landscaping improvements on Lost Hills Road. In addition, the project will include the construction of an off-ramp and on-ramp from Lost Hills Road to the northbound US-101, mostly through right-of-way to be acquired by Caltrans from County of Los Angeles.

A site reconnaissance was performed by Ninyo & Moore on April 2, 2009, to evaluate current environmental conditions of the site and adjacent properties. Please refer to Figure 2 for a detailed illustration of the site. Photographs of the site and adjoining properties are included in Appendix A.

The site is bound to the north-northeast by property owned by Los Angeles County Sanitation District (LACSD) that includes access to Calabasas Landfill No. 5 and northwest by single-family residences. The actual Calabasas Landfill operations are conducted approximately 1,200 feet northwest of the site (Figure 1). The site is bound to the east by vacant land in the northern portion, and commercial properties, with occupants such as Ipayment, Equity One, Ixia, and Atlas Development Corporation, in the southern portion. The site is bound to the south by commercial properties with occupants such as Oplink, The Cheesecake Factory Corporate office, Implant Direct, and the Lost Hills Sheriff Station. Vacant property is to the west of the site along US-101.

The properties of possible environmental concern discussed in the following sections are those properties that were identified from environmental databases of regulated facilities, a review of historical sources, and our site reconnaissance. A more detailed discussion of the historical sources is included in Section 3. A more detailed description of the facilities listed on the environmental databases is included in Section 5.

## **2.2. Site**

For the purpose of this section, we have divided the site into four quadrants: northwest, northeast, southeast, and southwest of the intersection of the US-101 and Lost Hills Road.

The northwest quadrant of the site is comprised of the City of Calabasas Grape Arbor Park, vacant land, and residential properties. Canwood Street and Parkville Road are located in this quadrant.

The northeast quadrant of the site is occupied by mostly undeveloped land (consisting of hillsides and valleys) and land that was previously developed for access to Calabasas Landfill No. 5 located to the north of the site. The proximity of the landfill operations can be seen on Figure 1.

The southeast quadrant of the site is comprised of vacant land that was under construction at the time of the site reconnaissance. This area is being developed for commercial retail.

The southwest quadrant of the site contains 3 commercial buildings: 26801 Agoura Road, which was occupied by Alcatel Lucent; 26901 Agoura Road, which was occupied by businesses such as Canon and ARCS Commercial Mortgage; and 27001 Agoura Road, which was occupied by businesses such as Pennymac, Countrywide, Exaktime, the ALS Association, and Catalina Graphic Films/GMI.

## **3. PHYSICAL SETTING**

The following sections describe the geologic and hydrologic characteristics of the site vicinity.

### **3.1. Site Topography**

Based on the review of the United States Geological Survey (USGS) 7.5-Minute Series Calabasas, California, Topographic Quadrangle Map, dated 1952 and photorevised in 1967, the site has a varying elevation ranging from 775 to 800 feet above mean sea level (msl).

### **3.2. Site Geology**

The site is located in the northern foothills of the east-west trending Santa Monica Mountains. The site is bounded to the south by Santa Monica Mountains and to the north by the Simi Hills. The site is located in an east-west trending drainage valley.

The area is underlain by upper Miocene Marine sedimentary rocks and Late Quaternary alluvium consisting of alluvial fan and floodplain deposits originating from Santa Monica Mountains and Simi Hills.

### **3.3. Hydrogeologic Conditions**

According to an Environmental Impact Report (EIR) prepared by the City of Calabasas Planning Division for The Summit at Calabasas Project to be located southeast of the bridge overcrossing dated February 2008, groundwater seeps were encountered during drilling of one boring in the vicinity of the interchange at depths between 21 and 24 feet. The seeps were described to be a result of perched groundwater conditions existing within thin beds of the Topanga Formation. The historic high groundwater level for the site has been mapped by the California Division of Mines and Geology (CDMG) in 1997 at a depth of approximately 20 feet below the ground surface (bgs) (CDMG, 1997). A water quality monitoring report prepared by the County Sanitation Districts of Los Angeles County, dated May 1, 2009, for the Calabasas Landfill indicates the depth to groundwater approximately 1,400 feet northwest of the site ranged from 52.28 to 59.17 feet bgs. Based on the referenced reviewed, groundwater is expected to be between 20 and 60 feet bgs below the site. The groundwater gradient is expected to flow in a south-southeasterly direction, following surface topography. Groundwater levels can fluctuate due to seasonal variations, groundwater withdrawal or injection, and other factors.

## **4. SITE AND VICINITY HISTORY**

This section describes historical site and vicinity land use.

#### **4.1. Aerial Photographs**

Aerial photographs provided by Environmental Data Resources Inc. (EDR) for the years 1928, 1947, 1956, 1964, 1977, 1989, 1990, 2002, and 2005. This review was conducted to evaluate previous land use at the site and adjoining the site, which may suggest the past use of hazardous substances. Aerial photographs are presented in Appendix B. The following is a summary of our review:

**1928 and 1947** – The site and vicinity appeared as vacant undeveloped land. Scattered residential properties appeared to the east and southwest of the site.

**1956** – The site appeared generally the same as the 1928 photograph, except the US-101 appeared to bisect the site.

**1964** – The site appeared generally the same as the 1956 photograph, except that Parkville Road, on the northwest portion of the site, appeared and the City of Calabasas Grape Arbor Park appeared to be under construction. A small residential structure appeared on the southeastern portion of the site.

**1977** – The site and site vicinity appeared similar to that observed in the 1964 photograph, except Rondell Street appeared on the site. A residential neighborhood appeared west of Parkville Road.

**1989 and 1990** – One of the three current onsite buildings (at 27001 Agoura Road) has been constructed. Lost Hills Road and Agoura Road appeared to have been constructed. The vicinity was generally not yet developed with commercial buildings. Additional residential properties appeared northwest of the site. Access road (Lost Hills Road) to the landfill was constructed prior to commencing landfill operations. The road embankment material appears to be generated from native soils and bedrock excavated north of the site. Operations had started on the landfill approximately 1,000 feet north of the site.

**2002 and 2005** – The site and site vicinity appeared similar to that observed at the time of the site reconnaissance.

Aerial photographs were not indicative of on-site environmental concerns.

#### **4.2. Topographic Maps**

The United States Geological Survey (USGS) Calabasas, California Quadrangle Map (topographic), dated 1952 and photorevised 1967 shows small residential structures on the southern portion of the site in 1952, and on the northern portion of the site in 1967. Rondell Street appeared on the site. An intermittent stream that flows southeast toward the Las Virgenes Creek appeared on the southwest portion of the site. A water well was located approximately 500 feet south of the site.

#### **4.3. City Directories**

Ninyo & Moore reviewed select historical city directories for the years 1950 through 2007 at the Sherman Gardens Library in Corona del Mar, California, and Haines Criss-Cross Directory in Fullerton, California. The following is a summary of our review.

##### Canwood Street

No listings were observed from 1950 through 2007 for properties along Canwood Street, along the northwest property margin, that would be located on the site. The Rancho Pet Kennels located west of the site at 27201 Canwood Road, was listed in 2000 and 2007.

##### Agoura Road

26787 Agoura Road – No listings were available from 1950 through 1990. In 1995 and 2000 the site was listed as Annalisa Maddy. The site was not listed in 2007.

26801 Agoura Road – No listings were available from 1950 through 2000. In 2007, 26801 Agoura Road was listed as Alcatel Internet.

26901 Agoura Road – No listings were available from 1950 through 2000. In 2007, 26901 Agoura Road was listed as ARCS Commercial Mortgage Inc, Canon Business Solutions West, Jon D. Cantor Atty, Gluck Development Co., Topanga Insurance Agency Inc., and Westrust Financial Inc.

27001 Agoura Road - No listings were available from 1950 through 1985. In 1989, 27001 Agoura Road was listed as PIP Printing. In 1995 and 2000, the site was listed as Lee Anderson, Capretta Enterprises, Capretta Property, Catalina Plastics, Corporate Point Deli, Graphic Materials, Imodco, MA Mutual Life Insurance, Network Telesis Inc., PIP Printing, Petrini Leo Clu, Postal Instant Press, REI Management Co., S L Rivetti Insurance Service, and Westrust Financial Inc. In 2007, the site was listed as ALS Association.

The Lost Hills Sheriff Station (off site at 27050 Agoura Road) was listed from 1995 through 2000.

City directories were not indicative of environmental concerns to the site.

#### **4.4. Sanborn Fire Insurance Rate Maps**

Sanborn fire insurance rate maps were not available for the site or surrounding areas.

#### **4.5. Oil and Gas Maps**

The State of California Department of Conservation Division of Oil, Gas, and Geothermal Resources (DOGGR) Wildcat Map W1-2 was reviewed to determine the existence of past or present oil wells along the site. According to map W1-2, no wells are located on the site or within the site vicinity.

#### **4.6. Provided Documents**

A water quality monitoring report prepared by the County Sanitation Districts of Los Angeles County, dated May 1, 2009 for the Calabasas Landfill indicates volatile organic compounds (VOCs) were detected in groundwater. VOCs were detected in three groundwa-

ter monitoring wells (RO2A, RO2B, and M22D) downgradient of subsurface Barrier 1, approximately 1,400 feet northwest of the site. The VOCs measured were 1,1-dichloroethane up to 0.8 micrograms per liter ( $\mu\text{g/l}$ ) and p-dichlorobenzene up to 2  $\mu\text{g/l}$ . The California Environmental Protection Agency (Cal-EPA) Maximum Contaminant Level (MCL) for drinking water for 1,1-dichloroethane is 5  $\mu\text{g/l}$ . A MCL has not been established for p-dichlorobenzene. The depth to water ranged from 52.28 to 59.17 feet bgs. Based on the low levels of contaminants detected in the groundwater and the distance from the site, there is a low likelihood that this facility would be considered an environmental concern to the site.

## **5. REGULATORY RECORDS REVIEW**

The following sections include the results and a discussion of the computerized environmental information database searches of State and Federal standard environmental records sources.

### **5.1. Environmental Database Searches**

An environmental information database search was performed for Ninyo & Moore by Environmental FirstSearch on March 20, 2009, for the site. Please refer to the Environmental FirstSearch report in Appendix C for a summary of the environmental databases searched, their search radii, and the search results. Please refer to the Environmental FirstSearch figures included in Appendix C for the approximate locations for properties listed by Environmental FirstSearch as having a potential environmental impact on the site.

#### **National Priorities List (NPL)**

This list identifies hazardous material sites slated for cleanup under the federally sponsored Superfund program. These sites receive remedial funding under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

No properties within a 1-mile radius of the site were listed on this database.

---

**Resource Conservation and Recovery Act (RCRA) – Treatment, Storage, and Disposal (TSD) Facilities List**

The RCRA TSD database includes facilities which have obtained a United States Environmental Protection Agency (EPA) identification number for the purpose of generating, treating, storing, or disposing of hazardous wastes.

No properties within a ½-mile radius of the site were listed on this database.

**Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)**

This list is a federally maintained database and contains data on potentially hazardous waste sites that have been reported to the EPA by states, municipalities, private companies, and private persons. CERCLIS contains sites, which are either proposed to or on the NPL, and sites which are in the screening and assessment phase for possible inclusion on this database.

No properties within a ½-mile radius of the site were listed on this database.

**Leaking Underground Storage Tank (LUST) Lists**

These lists are maintained by the State Water Resources Control Board, Regional Water Quality Control Boards, and County Environmental Health Departments.

Two facilities were listed on this database within a ½-mile radius. One facility listed, Las Virgenes Municipal Water, is actually located approximately 4 miles south of the site. A review of the other facility is below.

1. Lost Hills Sheriff's Station  
27050 Agoura Road  
Calabasas, California

Location: South of Agoura Road; adjoins the site  
Media Affected: Other groundwater (uses other than drinking water)  
Case Status: Open-site remediation

This facility had a jet fuel leak discovered in 1994. Information regarding this facility was obtained from the Los Angeles County Department of Public Works and is presented in Section 5.2.2. Based on the estimated direction of groundwater flow (south-southeast) and that this facility is over 500 feet south of and downgradient to the site,

there is a low likelihood that this facility would be considered an environmental concern to the site.

### **State Landfills and/or Solid Waste Disposal Sites**

As legislated under the Solid Waste Management and Resource Recovery Act of 1972, the California Waste Management Board maintains lists of active solid waste disposal sites, inactive or closed solid waste disposal sites, and transfer facilities.

One facility was listed twice on this database within the ½-mile search radius. The Los Angeles County Sanitation and Calabasas Landfill both at 5300 Lost Hills Road, partially located on the northern portion of the site, and upgradient of the site, were listed on this database. According to the database, this landfill is open only to residents and businesses of the City of Los Angeles and the Los Angeles County unincorporated areas west of the 405 Freeway and north of Sunset Boulevard. The accepted waste is “construction/demolition, green materials, industrial, mixed municipal, and tires.” It is listed as an “active” landfill. No other information was provided. This listing is not indicative of a release. Refer to Section 4.6 for more information.

### **Underground Storage Tank (UST) Registration List**

This list identifies properties which have historically contained or currently contain registered USTs. This listing is related to permitting records and is not indicative of a release.

One facility was listed on this database within the ¼-mile search radius. The Los Angeles County Sheriff, Lost Hills Station at 27050 Agoura Road, adjoining the southern portion and downgradient of the site, is listed on this database. No other information was provided; this facility is discussed further in Section 5.2.

### **RCRA Generators List**

The EPA’s RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Generators List is a compilation by the EPA of facilities which generate hazardous waste.

Neither the site nor adjacent properties were listed on this database.

### **Emergency Response Notification System (ERNS)**

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil and hazardous substances. The database contains in-

formation from spill reports made to federal authorities including the EPA, the United States Coast Guard, the National Response Center, and the Department of Transportation.

The site was not listed on this database.

## **5.2. Regulatory Agency File Reviews**

Copies of Regulatory Agency files are presented in Appendix D.

### **5.2.1. Los Angeles County Sanitation District (LACSD)**

Ninyo & Moore contacted the LACSD regarding landfill activities at the Calabasas Landfill No. 5. According to Ms. Gwen Tantoco, the LACSD engineer for the Calabasas Landfill, there has been no landfill activities and there are no plans for future landfill activities in the proposed Caltrans ROW area.

### **5.2.2. Los Angeles Regional Water Quality Control Board (LARWQCB)**

The Los Angeles RWQCB is divided into three units: UST, Spills Leaks Investigatory Cleanup (SLIC) 1 unit, and SLIC 2 (the former Well Investigatory Program [WIP] unit). Ninyo & Moore made a request to the RWQCB's UST, SLIC1, and SLIC 2 units to review records that may be available for the site. According to the RWQCB's UST, and SLIC 2 units, no records were available for the site addresses. A request was also made to the RWQCB for the adjacent Lost Hills Sheriffs Station. According to the RWQCB's UST, and SLIC 2 units, no records were available for the site.

### **5.2.3. Los Angeles Department of Public Works (LADPW)**

A request regarding the site was made with the LADPW regarding USTs and industrial waste. According to the LADPW, no records were available for the site addresses.

A request was also made to the LADPW for the adjacent Lost Hills Sheriffs Station. According to the LADPW records, a 10,000-gallon UST containing jet fuel is at the facility. A leak of jet fuel was discovered from an UST in 1994. The UST was removed and replaced with a 12,000-gallon UST in 1994 and during the removal, soil samples

and a water sample were collected from the tank pit. The samples reportedly had detectable concentrations of total petroleum hydrocarbons (TPH) and benzene, toluene, ethylbenzene, and xylenes (BTEX) below action levels. In 1995, the two groundwater monitoring wells at the facility were sampled and the results of the sampling indicated a benzene concentration of 3.7 parts per billion (ppb), which is above the drinking water standard of 1 ppb. The LADPW required an additional groundwater monitoring well to be installed and sampled. The installation of the additional groundwater well was attempted, however groundwater was not encountered to the total depth explored of 22 feet bgs. Petroleum contamination was reportedly not encountered in the soil samples collected during the attempted well installation. The LADPW subsequently required two years of quarterly groundwater monitoring at the facility. However, groundwater monitoring reports were not included in the file.

In 1995, three separate reports document soil sampling at the facility beneath the ground surface of the dispenser island and piping for the 10,000-gallon gasoline UST and the dispensing lines for the 12,000-gallon jet fuel UST. The reports document no detectable concentrations of TPH or BTEX in the samples analyzed.

Based on the estimated direction of groundwater flow (south-southeast) and that the location of the UST at this facility is over 500 feet south of and downgradient to the site, there is a low likelihood that this facility has affected the environmental integrity of the site.

#### **5.2.4. Los Angeles Department of Public Health Investigation (LADPHI)**

A request was made to the LADPHI for records regarding the site. According to the LADPHI, records were available for 27001 Agoura Road. An EPA Regulated Waste Activity worksheet dated 1990 indicated that PIP Printing used approximately 3 pounds of ink per month and 5 gallons of solvent. Records indicated that a “Hazardous Materials Incident Report” was filed in 1999 against PIP Printing. The incident report indicated a complaint from a citizen that “chemical odors getting people sick.” No follow-up for

this report was found in the file. This incident is not indicative of a release of hazardous materials.

Based on the nature of the information available, the activities at this location do not appear to have affected the environmental integrity of the site. Additionally, based on available information, PIP Printing is no longer at this location.

#### **5.2.5. South Coast Air Quality Management District (SCAQMD)**

Ninyo & Moore reviewed the South Coast Air Quality Management District's (SCAQMD) facility information detail search (FINDS) website for permits regarding the site. An active permit was available for Alcatel Industries at 26801 Agoura Road. The permit, dated 2000, indicated the property had a diesel generator. No violations were reported. An active permit was available for THQ Inc. at 27001 Agoura Road. The permit had no equipment listed and no violations reported. These permits are not indicative of environmental concerns.

#### **5.2.6. California Department of Toxic Substances and Control (DTSC)**

A request was made to the DTSC to review available files and information regarding the site. According to a representative of the DTSC, no records regarding the site were available. Additionally, the EnviroStor database maintained by DTSC was reviewed for information regarding the site addresses. No records were found on the Envirostor database for the site.

## **6. SITE RECONNAISSANCE**

On April 2, 2009, a site reconnaissance was conducted by Ms. Beth Padgett of Ninyo & Moore. The reconnaissance involved a walking tour of the site and adjoining properties. Individual property inspections and interviews were not conducted.

### **6.1. Polychlorinated Biphenyls (PCBs)**

Pole-mounted and pad-mounted transformers were observed along the north side of Agoura Road. Southern California Edison (SCE) reported to Ninyo & Moore that it is highly unlikely that transformers adjacent to Agoura Road contain PCBs. SCE transformers exclusively utilize mineral oil as the insulating/cooling fluid in their transformers. No staining or other evidence of leaks from the transformers were observed during the site reconnaissance.

### **6.2. Hazardous Substance Use and Storage**

During the site reconnaissance, a visual survey for indications of the use or storage of hazardous substances was performed. Such indications could include significant staining or degraded pavement, chemical containers, distressed vegetation, and the presence of pits, ponds or lagoons. Indications of on-site hazardous substance use and storage were not observed at the time of the site reconnaissance.

### **6.3. Hazardous Waste and Solid Disposal**

The Calabasas Landfill No. 5 was observed on the northern portion of the site, and adjoining the site upgradient to the north. However, evidence of landfill activities were not observed at the time of the site reconnaissance. The area of the site occupied by the Calabasas Landfill No. 5 property appears to be vacant undeveloped land and not used for landfill activities. This facility is further discussed in Section 5.0.

### **6.4. Aboveground and Underground Storage Tanks (ASTs and USTs)**

Evidence of aboveground storage tanks (ASTs) and USTs (i.e., fill pipes, vent pipes, and emergency power generators) was not observed at the time of the site reconnaissance.

### **6.5. Pits, Sumps, Drywells, Agricultural Wells, or Catch Basins**

Evidence of pits, sumps, drywells, or catch basins was not observed at the time of the site reconnaissance.

## **6.6. Other**

According to the maps within the November 2008 water quality monitoring report, a runoff monitoring location is located on the northwest portion of the site. No other evidence of environmental concern was observed during the site reconnaissance.

## **7. SUMMARY OF FINDINGS**

The site was vacant undeveloped land from at least 1928 through 1947. The US-101 has been located in the central portion of the site from 1956 through the time of this report. The City of Calabasas Grape Arbor Park has been at the northwest portion of the site from at least 1967 through the time of this report. The commercial building at 27001 Agoura Road, in the southwest portion of the site, has been located on the site since at least 1989. From at least 2002 through the time of this report, the southwest portion of the site has been developed with the commercial buildings at 26801 and 26901 Agoura Road. A small residential structure at 26797 Agoura Road has occupied the southeastern portion of the site from at least 1964 through 2008 and is currently being replaced by commercial retail development.

A portion of land owned by LACSD for the operation of Calabasas Landfill No. 5, at 5300 Lost Hills Road, is on the northern portion of the site and is upgradient of the site. Trace levels of VOCs have been detected in groundwater at this facility in a groundwater monitoring well approximately 1,400 feet north of the site. Based on the low levels of VOCs detected in the groundwater samples and the distance from the site, there is a low likelihood that this facility has impacted the environmental integrity of the site. However, at the request of Caltrans, recommendations are provided to evaluate for the suspected presence of VOCs, Semi-VOCs (SVOCs), TPH, Title 22 Metals, and pH within Calabasas Landfill property along the new ROW for the proposed northbound US-101 on- and off-ramps.

The Lost Hills Sheriff Station at 27050 Agoura Road was listed on the LUST database as having a jet fuel release affecting soil and groundwater. Based on the estimated direction of groundwater flow (south-southeast) and that the release at this facility is over 500 feet south of and downgra-

dient to the site, this facility does not appear to have affected the environmental integrity of the site.

## **8. RECOMMENDATIONS**

Based upon the findings of this study, we make the following recommendations:

- The US-101 is located through the central portion of the site. This presents an aerially deposited lead (ADL) concern in unpaved areas of the site. ADL survey should be conducted at unpaved locations of the site prior to any earth disturbance.
- Prior to demolition/modifications to the Lost Hills Road Bridge, an asbestos containing materials (ACM) and a lead-based paint (LBP) survey should be performed.
- Prior to demolition/renovation of roadways, paint chip sampling should be conducted on the yellow paint, pavement markings, or thermoplastic stripes.
- An evaluation should be conducted along the proposed ROW for the northbound on- and off ramps of suspected occurrence of impact from activities associated with landfill operations northwest of the site. This should include soil (and groundwater, if encountered) sampling and observations of borings and test pits for indications of impacts from VOCs, SVOCs, TPHs, Title 22 Metals, and pH.
- As with all construction projects of this nature, we recommend that all work be conducted under the conditions of a site specific health and safety plan approved by a Certified Industrial Hygienist. We also recommend that a monitoring and contingency plan be in place and implemented if suspected contamination is encountered any time during construction.
- We recommend that if construction dewatering is anticipated, proper permits be obtained.

## **9. LIMITATIONS AND EXCEPTIONS OF THE ASSESSMENT**

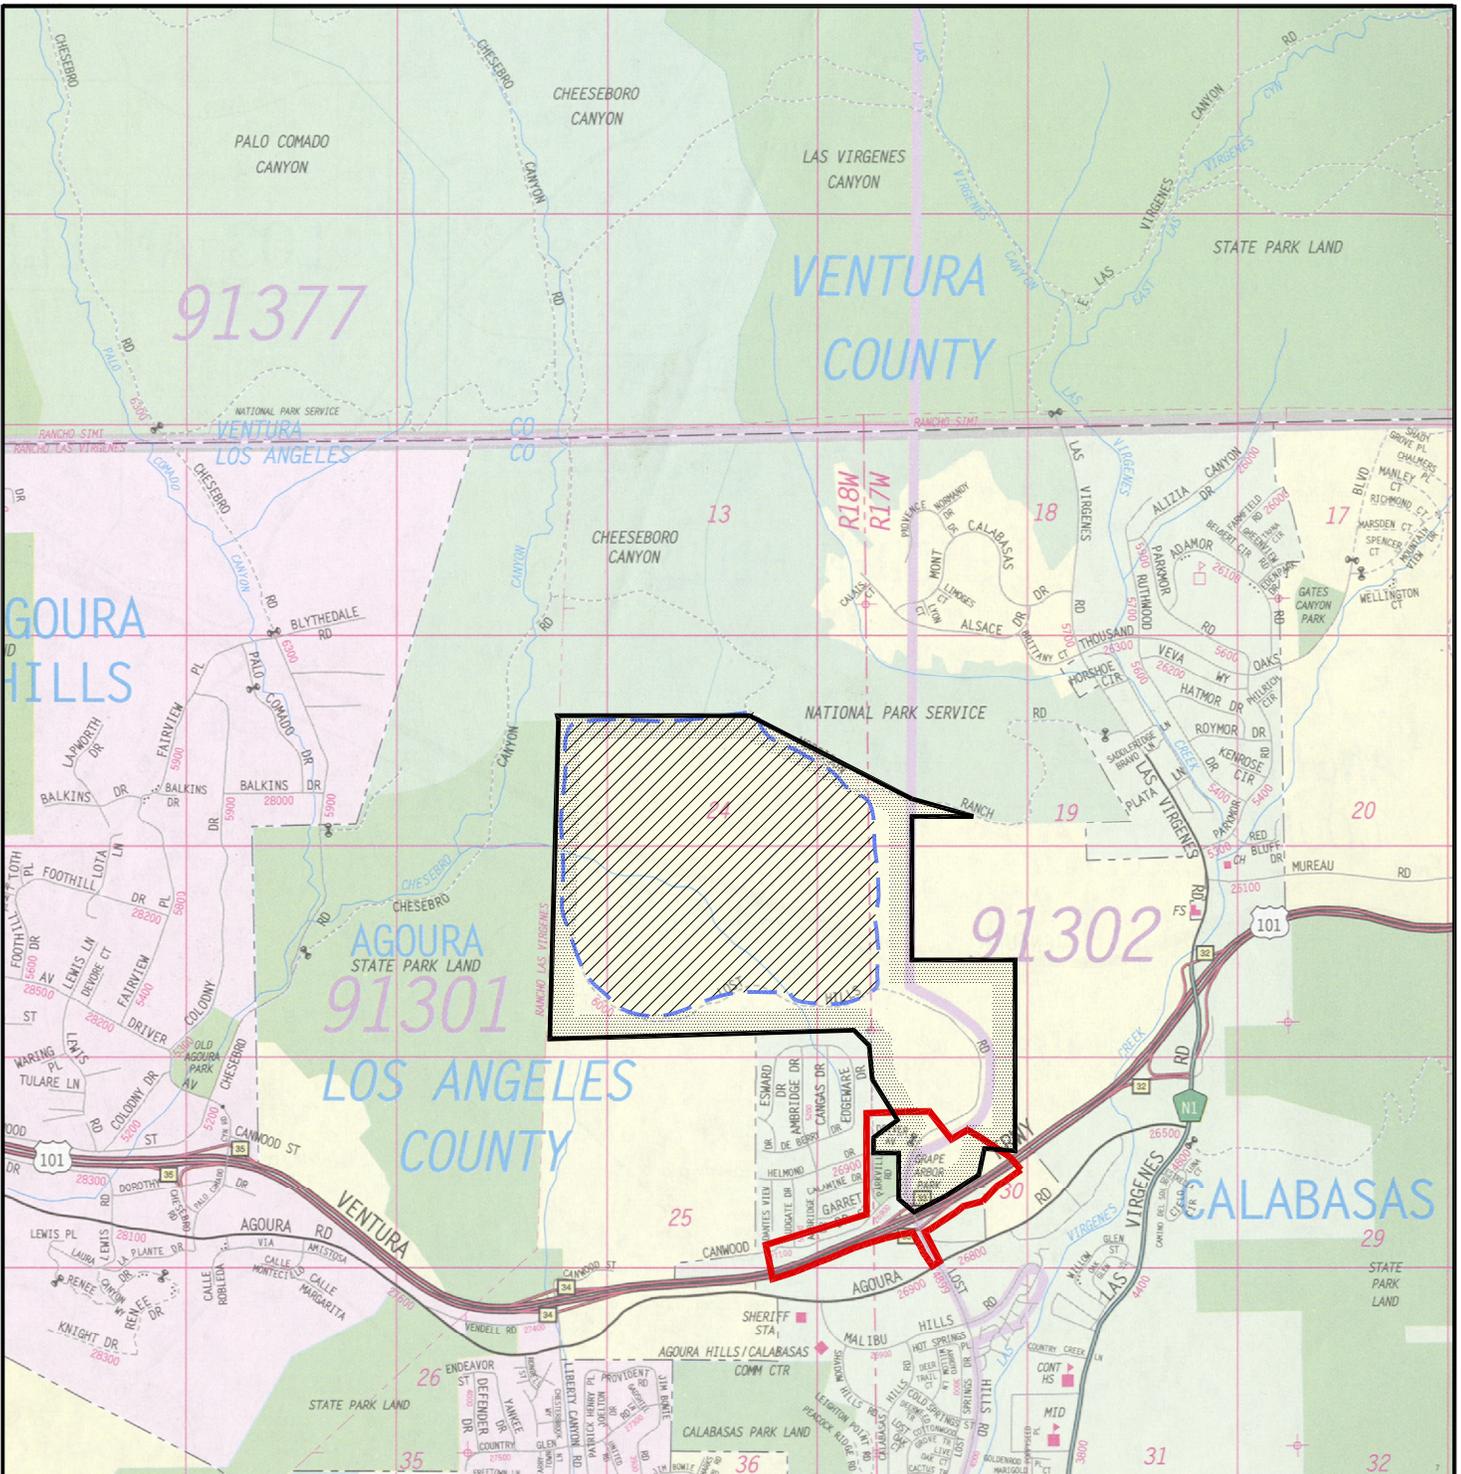

The opinions and recommendations presented in this report are based upon the results of our site reconnaissance, review of an environmental database search, review of historical aerial photographs, review of historical topographic maps, review of Division of Oil and Gas maps, and interviews with agency officials. Further assessment of possible adverse environmental impacts from past activities adjoining the site and surrounding facilities may be accomplished by a more comprehensive assessment, which would likely include additional inquiry, soil borings, completion of soil sampling and analysis, and installation of groundwater monitoring wells.

The opinions presented herein apply to site conditions existing at the time of our ISA, and cannot be taken to apply to site changes or conditions of which we are not aware and/or have not had the opportunity to evaluate.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information, or has questions regarding project information, or the content, interpretations presented, or completeness of this document.

Opinions and judgments expressed herein, which are based on our understanding and interpretation of current regulatory standards, should not be construed as legal opinions. In the event conditions change from those described in this ISA, Ninyo & Moore reserves the right to review such conditions and to modify, as appropriate, the assessments and conclusions provided in this report. We cannot state with certainty that shallow soil beneath the site has not been contaminated. A greater level of certainty can be attained through additional subsurface assessment of the soil.

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. ## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

## EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/12/2008 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/25/2008 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **Other Ascertainable Records**

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 2 RCRA-NonGen sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

<b>SAKI MAGNETICS INC</b>	<b>26600 AGOURA RD</b>	<b>ENE 1/8 - 1/4 (0.163 mi.)</b>	<b>5</b>	<b>26</b>

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites). This listing is no longer updated by the state agency.

A review of the Cortese list, as provided by EDR, and dated 04/01/2001 has revealed that there are 4 Cortese sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 09/23/2008 has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Hazardous Waste Summary:**

Waste code: 212  
Waste name: 212

Waste code: 213  
Waste name: 213

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018  
Waste name: BENZENE

Waste code: F002  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Biennial Reports:

Last Biennial Reporting Year: 2005

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.  
Amount (Lbs): 7419.8

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.  
Amount (Lbs): 4600

Comments:

Preliminary Assessment: 01/30/61 - IW Permit #2464 issued to Los Angeles County Sanitation District. Permit #19-AA-056. Source of Activity: Chemical, petroleum, metal working, plating, construction, hospital, mixed municipal wastes. 05/01/61 - RWQCB Facility Identified: Eckhardt Survey. Records Search: 04/01/80 - County Sanitation Inspection. 07/31/80 - County Sanitation: suspended the acceptance of Group I hazardous wastes; Group II liquid wastes pending. RWQCB: Revised Waste Discharge Requirement (WDR) for land-fill, Order #81-12 changed to Class II Landfill & requires drainage improvement as criteria for leachate barrier construction. Leachate barrier construction will start soon and groundwater monitoring system will be completed iapproved conditions and limitations of County Permit. From 1965 to 07/31/80, received hazardous wastes. 05/21/81 - Saratoga Homeowners Committee filed a petition with RWQCB

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/29/2008	Source: EPA
Date Data Arrived at EDR: 10/10/2008	Telephone: N/A
Date Made Active in Reports: 11/19/2008	Last EDR Contact: 01/26/2009
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: Quarterly

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2008	Source: EPA
Date Data Arrived at EDR: 10/10/2008	Telephone: N/A
Date Made Active in Reports: 11/19/2008	Last EDR Contact: 01/26/2009
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 05/18/2009
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/29/2008	Source: EPA
Date Data Arrived at EDR: 10/10/2008	Telephone: N/A
Date Made Active in Reports: 11/19/2008	Last EDR Contact: 01/26/2009
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/07/2008	Source: EPA
Date Data Arrived at EDR: 10/16/2008	Telephone: 703-412-9810
Date Made Active in Reports: 12/08/2008	Last EDR Contact: 01/30/2009
Number of Days to Update: 53	Next Scheduled EDR Contact: 04/13/2009
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810
Date Made Active in Reports: 02/20/2008	Last EDR Contact: 03/16/2009
Number of Days to Update: 76	Next Scheduled EDR Contact: 06/15/2009
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/11/2008	Source: EPA
Date Data Arrived at EDR: 09/19/2008	Telephone: 800-424-9346
Date Made Active in Reports: 10/16/2008	Last EDR Contact: 03/03/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 06/01/2009
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008  
Date Data Arrived at EDR: 11/18/2008  
Date Made Active in Reports: 03/16/2009

Last EDR Contact: 03/13/2009  
Next Scheduled EDR Contact: 05/18/2009  
Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/12/2008

Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008  
Date Data Arrived at EDR: 11/18/2008

Last EDR Contact: 12/29/2008  
Next Scheduled EDR Contact: 03/30/2009  
Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/06/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/17/2008	Telephone: 703-603-0695

## **Federal ERNS list**

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2007	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/23/2008	Telephone: 202-267-2180
Date Made Active in Reports: 03/17/2008	Last EDR Contact: 01/30/2009
Number of Days to Update: 54	Next Scheduled EDR Contact: 04/19/2009
	Data Release Frequency: Annually

## **State- and tribal - equivalent NPL**

### RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/25/2008	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/26/2008	Telephone: 916-323-3400
Date Made Active in Reports: 01/27/2009	Last EDR Contact: 02/24/2009
Number of Days to Update: 62	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/25/2008	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/26/2008	Telephone: 916-323-3400
Date Made Active in Reports: 01/27/2009	Last EDR Contact: 02/24/2009
Number of Days to Update: 62	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: Quarterly

## **State and tribal landfill and/or solid waste disposal site lists**

### SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LUST: Geotracker's Leaking Underground Fuel Tank Report

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Number of Days to Update: 62	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: Quarterly

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 10/01/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/14/2008	Telephone: 202-566-2777

## **Local Lists of Hazardous waste / Contaminated Sites**

**CDL: Clandestine Drug Labs**

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/01/2008	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 10/31/2008	Telephone: 202-307-1000
Date Made Active in Reports: 12/23/2008	Last EDR Contact: 10/31/2008
Number of Days to Update: 53	Next Scheduled EDR Contact: 03/23/2009
	Data Release Frequency: Quarterly

**HIST CAL-SITES: Calsites Database**

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

**SCH: School Property Evaluation Program**

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 11/25/2008	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/26/2008	Telephone: 916-323-3400
Date Made Active in Reports: 01/27/2009	Last EDR Contact: 02/24/2009
Number of Days to Update: 62	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: Quarterly

**TOXIC PITS: Toxic Pits Cleanup Act Sites**

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## Local Land Records

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 11/20/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/23/2008	Telephone: 202-564-6023
Date Made Active in Reports: 03/16/2009	Last EDR Contact: 03/03/2009
Number of Days to Update: 83	Next Scheduled EDR Contact: 05/18/2009
	Data Release Frequency: Varies

## LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 03/09/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/08/2009
	Data Release Frequency: Varies

## LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 11/06/2008	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/07/2008	Telephone: 916-323-3400
Date Made Active in Reports: 11/26/2008	Last EDR Contact: 02/02/2009
Number of Days to Update: 19	Next Scheduled EDR Contact: 05/04/2009
	Data Release Frequency: Varies

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/30/2008	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 12/30/2008	Telephone: 916-323-3400

	Data Release Frequency: Quarterly

## MCS: Military Cleanup Sites Listing

The State Water Resources Control Board and nine Regional Water Quality Control Boards partner with the Department of Defense (DoD) through the Defense and State Memorandum of Agreement (DSMOA) to oversee the investigation and remediation of water quality issues at military facilities.

Date of Government Version: 01/06/2009	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/08/2009	Telephone: 866-480-1028
Date Made Active in Reports: 01/27/2009	Last EDR Contact: 01/08/2009
Number of Days to Update: 19	Next Scheduled EDR Contact: 04/06/2009
	Data Release Frequency: Quarterly

## **Other Ascertainable Records**

### RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 11/12/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/18/2008	Telephone: (415) 495-8895

Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006  
Date Data Arrived at EDR: 03/01/2007  
Date Made Active in Reports: 04/10/2007

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005	Source: EPA/NTIS
Date Data Arrived at EDR: 03/06/2007	Telephone: 800-424-9346

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 07/16/2008  
Date Data Arrived at EDR: 10/29/2008

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2006	Source: Department of Environmental Protection
Date Data Arrived at EDR: 12/11/2008	Telephone: 860-424-3375
Date Made Active in Reports: 03/19/2009	Last EDR Contact: 03/13/2009
Number of Days to Update: 98	Next Scheduled EDR Contact: 06/08/2009
	Data Release Frequency: Annually

### NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 09/30/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 12/04/2007	Telephone: N/A
Date Made Active in Reports: 12/31/2007	Last EDR Contact: 02/20/2009

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	808 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	34118-B6 CALABASAS, CA
Most Recent Revision:	1967

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

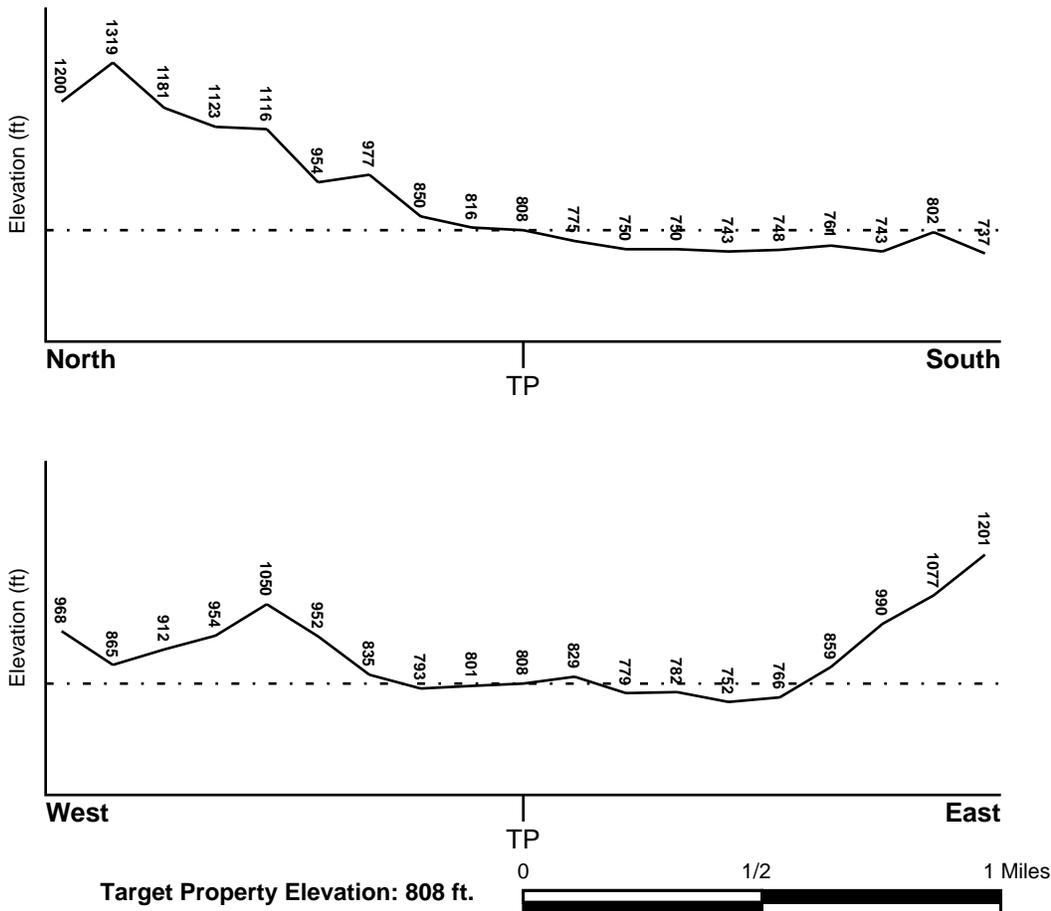

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Target Property County</u>	<u>FEMA Flood</u>

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic</u>
CALABASAS	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/2 - 1 Mile ENE	SW
A2	1/2 - 1 Mile NE	SW
A3	1/2 - 1 Mile NE	SW
A4	1/2 - 1 Mile NE	SW

For additional site information, refer to Physical Setting Source Map Findings.

\* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Cumulic Haploxerolls

Soil Surface Texture: stratified sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	15 inches	stratified sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.6
2	15 inches	68 inches	stratified clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 2

Soil Component Name: Linne

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	24 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.06 Min: 0	Max: Min:
2	24 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.06 Min: 0	Max: Min:
3	29 inches	29 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.06 Min: 0	Max: Min:

### Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

---

### Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

---

### Soil Map ID: 5

Soil Component Name: No digital soils data available

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:  
Hydric Status:

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 6**

Soil Component Name: Pits and dumps

Soil Surface Texture: variable

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

**Soil Map ID: 7**

Soil Component Name: Botella

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 7.3 Min: 5.6
2	7 inches	59 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 7.3 Min: 5.6

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

NOTICE OF VIOLATION AND ORDER TO COMPLY

The following conditions or practices observed at your facility are violations of the California Code of Regulations (CCR), Title 26, Division 22 or the California Health and Safety Code, Division 20, Chapter 6.5, (H&S) which relate to the storage, management, transportation, and disposal of hazardous waste. YOU ARE DIRECTED TO CORRECT THE VIOLATIONS WITHIN THE TIMES SPECIFIED BELOW.

CORRECTION DATE

DISPOSAL:

1. Discontinue the disposal of hazardous waste to an unauthorized point(s) (H&S 25189.5)
2. Legally dispose of all hazardous waste and contaminated materials (H&S 25189.5) (H&S 25189.5) & (H&S 25186.2) ( stored at/  discharged to)

MANAGEMENT:

3. Submit to this office a copy of your facility's hazardous materials contingency plan and employee training plan. (CCR 67105, 67120-67126, 67140-67145)

TRANSPORTATION:

4. Discontinue the transport of hazardous waste until the following have been met:
- A. Obtain an EPA Identification Number from the State Department of Health Services at (916) 324-1781 (CCR 66472)
- B. Complete a uniform Hazardous Waste Manifest or obtain a receipt when applicable under State Department of Health Services variance procedures.
- C. Transport all hazardous waste by a State registered hauler. (H&S 25163)
5. Submit to this office a copy of the completed hazardous waste manifest(s) used to dispose of 11/27/89 - 5/15/90 (CCR) 66328)
6. Keep copies at your facility of all completed manifests, receipts or both for a minimum of 3 years and make documents available for agency review. (CCR-66492)

STORAGE:

7. Discontinue the storage of hazardous waste for longer than 90 days without a permit from the State Department of Health Services (CCR 66508)
8. Store all hazardous waste in compatible containers which are closed and in good condition. (CCR 66241-67243)
9. Properly label all hazardous waste containers with the following: the words, "HAZARDOUS WASTE"; name and address of generator, hazardous properties; a composition and physical state of the waste; and the accumulation date (CCR 66693-66746)

OTHER:

10. Provide this office with a site assessment and mitigation plan for the contamination at your facility (H&S 25245-25249)
11. Provide this office with a copy of a waste determination conducted by a state certified laboratory or waste documentation in accordance to the regulations. (CCR 66693-66746)
12. A. No violations noted. Good recordkeeping

Failure to fully comply with this Notice and Order may result in further legal action.
