

Las Virgenes Rd. Scenic Corridor Widening

OVERVIEW

The Las Virgenes Road Scenic Corridor Widening project addresses the design modifications needed to provide two travel lanes in each direction, bike lanes, landscaped medians and continuous sidewalks along the western side of the road.

Metro's Measure R funding allowed the City to move forward with planning and design for the Las Virgenes Road Scenic Corridor Widening Project.

The project limits are Agoura Road to Lost Hills Road.

Through public workshops and presentations at the Traffic and Transportation Commission meetings, a design was developed for Las Virgenes Road that incorporates increased traffic flow, pedestrian enhancements, bicycle facilities, and new traffic signals.

- Oak Trees will be saved and relocated
- 7 to 12 feet of landscaped linear park will be conserved.
- Landscaped medians
- Two new signalized intersections
 - Las Virgenes Rd. & Willow Glen Rd.
 - Las Virgenes Rd. & Oak Glen St.

Project updates will be posted on the following website
