CANYON DRIVE RESURFACING PROJECT

NOTICE OF ROAD WORK

Canyon Drive between Mulholland Hwy and Valley View Rd is scheduled for roadway resurfacing, tentatively scheduled between July 11, 2016 and August 3, 2016. The work is scheduled to be completed within the shortest possible timeline, provided no extenuating circumstance arises. If the project is delayed, you will be notified of the reason for the delay with an updated schedule.

The project consists of saw-cutting; excavation, removal and disposal of the old roadway section; cold planning and disposal of AC pavement; replacement and compaction of subsurface material; setup and maintenance of temporary traffic control system; construction of AC berm, replacement of traffic striping and markings of the project area and Asphalt Rubberized Hot Mix (ARHM) overlay.

Vehicles will have access during the resurfacing project. However, there will be times when there is only one travel lane with flagging operations along the corridor. The contractor is instructed to minimize disruption to area residents and access to the side streets and driveways will be maintained at all times.

When the crews are working, there will be construction equipment and trucks in the area. Please drive carefully and observe all posted signs and control devices. Your cooperation and patience are requested during the construction period and will be rewarded with a new, smooth and longer serviceable roadway surface.

Thank you for your cooperation and understanding.

Sincerely,

A handwritten signature in blue ink, appearing to read "Robert Yalda".
