We want your participation!

Along with all jurisdictions throughout California, the City of Calabasas is mandated by State Law to prepare a Housing Element update. The Housing Element is part of the City's General Plan and includes goals, policies, programs, and quantified objectives for adequately housing our future population.

Input from community residents and other stakeholders in the Housing Element update process is crucial to ensuring development of fair, effective, and achievable housing strategies. For this reason we urge you to please participate and share your ideas for housing all the people of Calabasas.
