

# Dispose Of Your Batteries the Right Way

Batteries should not go in household garbage or recycling bins - they can cause fires during transport or at landfills!

Residents of Calabasas can drop off their household batteries at select locations to be recovered and reused. Recycling household batteries saves natural resources, diverts heavy metals from entering our local landfills, and protects our environment. When a battery is sent to landfill, the materials are lost and can never be recovered.

#### STEP 1:

Use tape or insulating sticker

#### STEP 2:

Place tape on positive (+) end

#### STEP 3:

Fold tape over edges

#### STEP 4:

Collect in the box/ take to an approved drop-off location

Please ensure the safety of our roads and the continued success of our battery recycling program.

**Insulate the positive (+) end of your battery before disposing.**

To find your nearest battery drop-off location, learn more about the program and processes, or review accepted items, please visit [www.cityofcalabasas.com](http://www.cityofcalabasas.com) or scan the QR Code.

Thank you for your cooperation and for recycling.
