Subject: Landscaping Valmar median

Dear City Council Members,

It has just come to our attention that an item near and dear to our hearts will be discussed at the City Council meeting on Wednesday, August 26. ITEM NUMBER 6 concerns landscaping the median on Valmar which is an entry to three Calabasas communities. We urge that you consider beautifying the easterly gateway to Calabasas. Rather than being redundant, please refer to Carol Davis' letter with which we are in complete agreement.

Thank you for your attention to this matter.

Respectfully submitted,
Jackie & Norman Hoffman, Residents since 1973, Proud members of the Calabasas Senior Center
22637 DeKalb Drive, Mulwood, Calabasas, Ca. 91302

Subject: **Fwd: Landscaping of Valmar Median**

Dear City Council Members,

I recognize that you have many things of importance on your agenda tonight. However, I do not want **Item Number 6** to get lost in the shuffle.

The median and monument on Valmar have been a stepchild for over two years. The reasons given for the lack of beautification include lack of water and the cost of the watering. Coincidentally on the same agenda on **Item Number 7** there is 3.5 million dollars from the Woolsey Fire, that can be spent unencumbered on any project the City Council deems worthy. On the list of possibilities bringing water to the median is not even listed.

I strongly suggest that this project be added to the "To Do" list. It will not even "tickle" the 3.5 million; probably will cost less than the estimated \$140,000; will relieve the budget in the future; will eliminate the need for hand watering (similar to what is being done on the traffic circles on Paul Revere), will bring the ambiance of the Valmar Entrance to Calabasas up to the standards that won our city the award of **Flower Beautiful City** ; and once and for all settle the problem without having to wait for the ever elusive grants..

Respectively submitted,

Maricela Hernandez
