Subject: Urgent appeal: Please keep 100% Renewable Energy Decision!

Hello Calabasas City Council,

As a city resident I am writing to strongly urge you to keep the decision for the City's default electricity to come through Clean Power Alliance 100% renewable energy!

Reasons to maintain this great decision that you already made, of which we can all be proud, are:

- If the price goes up, anyone for whom that is a hardship, or who is not willing to pay it, will still have the option to change to a lower rate.
- Calabasas needs to do everything possible to keep us safe from climate related disasters such as fire and drought, and this step is a significant one in that regard. If we don't do it, we are contributing to putting ourselves in danger.
- If Calabasas, a mainly high income community, does not do its part to fight climate change, which threatens our children's and grandchildren's lives and well-being, it will be a disgrace.
- The cost of doing this is, in the bigger picture, is much less than the cost of not doing it.

I hope we can rely on you to maintain the decision you originally made, and therefore keep our city on track to be default 100% renewable!

Thank you,

Vivian Deutsch, Calabasas resident

Good afternoon -

I would like to share my concerns - not sure CPA is the way to go 100% especially after seeing what happened in Texas.

Cannot imagine why SCE thinks we should pick up the tab for their failure in wildfire lawsuits but - regardless of that - a 30-35 raise in rates is unconscionable especially in Covid times.

Thanks for being there - stay healthy and safe - Ellen Pangarliotas
