

Diamond Painting Information and Links

Diamond painting is a cross between painting by numbers and cross stitch. The paintings come with either gems, crystals, or rhinestones. These gems can be round, square, or a mixture. Following the numbers and/or symbols you apply these gems and create your own work of art. Besides kits, there are many accessories that crafters can buy to enhance the pleasure of making their painting. Below are links to a few places that offer kits, however, please review each site as they offer personalized pictures, different works of art and pictures, along with different gems, sizes, and accessories.
