

DO YOU FIND IT HARD TO PREPARE FOR WILDFIRE SEASON?

The Resource Conservation District of the Santa Monica Mountains is working with Conservation Biology Institute to better understand how residents of Southern California prepare their home and landscape to reduce the risk of wildfire to their property.

ABOUT THIS SURVEY

- This **anonymous** survey takes about **15 minutes** to complete.
- It focuses on **people's understanding, motivations, and barriers** to taking steps to protect their home against wildfire ignitions and to maintain defensible space.
- The results will be combined with other data and analyzed to **understand the factors** that make it more or less likely that these actions will be taken.
- The survey will guide **future community support** to improve wildfire safety.
