

Calabasas Library App

The Calabasas Library has an app available. Go to the App Store or Google Play and look up Calabasas Library. Or click here - <http://innovativemobile.net/CalabasasLibrary>

When you download the app, you need to enable the camera to be able to use the self-checkout features. (iPhone 10 and before will have limited service, for instance, checking out books within the library. Android needs to be version 5 or above to work properly.)

You can check your account, search for materials, check out items yourself in the library and more.

Self-Check –

Enable Location Services (you must be on City of Calabasas Public Library Wifi.) A green square will appear, click it.

Your phone is ready to scan to check out. Place your phone on or near the square tag that is on the inside back cover of the book.

If you have trouble checking out a DVD, Book on CD or any item, you may go to the circulation desk or self-check and show them the barcode on the bottom of the app. Rentals need to be checked out at the circulation desk.

When you go back to My Account, it will show the checked out items. You can renew from there if possible.

You can checkout e-books and e-audiobooks in the library and at home on the Library app, but you must go to the Cloud Library app to read or listen.

Other features on the app –

My Account – shows checkouts, holds, fines and other information.

Library Spotlight – These are books that the Librarian want to highlight. These are usually New Books.

What's On is our calendar of events.

Scan ISBN Barcode – if you are at a store and see a book you like, scan the ISBN barcode on the book to see if the library carries it.

E-Media – our digital services information and links

Online Resources – our online resource information and links

Other Resources – the other webpages on our library website

Social – links to our social media

At the bottom of the app is My Barcode – click this to bring the barcode up to check out at the circulation desk.

Some digital items, such as streaming video, it will link you to that website and you need to watch the item there after you log in. Information to log in on our website before you click the link to go to the digital website.
