2005 Chevrolet C5V042 CUTAWAY, 6.6L V8 OHV 16V TURBO DIESEL.

Bus start and ran when parked in 2021. Battery was stolen during that time so some wires to battery may have been cut. It will need a new battery. No other known issues.

The city will require city council to approve the sale at the close of the auction. We will have a response back on approval within 7 days of the close of the auction.

? Questions and Answers

Q: How long is this vehicle? Can I do battery repair onsite when picking it up? Will this not pass the CARB rules as-is? Thanks! (9/27/23 6:36 PM)

A: The City does not have exact measurements for these vehicles. We suggest checking with the manufacturer for specifications. If it is just installing a battery, it can be done on site as long as we have notice as to when you will be there to pick it up. No major work, with work time is limited to 1 hour. The shuttles were originally CARB compliant when purchased, however, parts may have been altered or removed over the life of the vehicle so we are unable to confirm whether they are currently CARB compliant or not. I have over 8 years of experience and would love to be there for those who have any questions when it comes to shipping. Feel free to contact me at any time 941-615-7502 and I can get you a free quote immediately and provide more information about us. However, we must add that in no way, shape, or form can Govdeals be held liable. *From our experience, buyers hold back on bidding because they have no idea how to get the item to themselves. Now they do not have to worry. God Bless (9/25/23 4:36 PM)
