PUBLIC PARTICIPATION HEARING

AT&T's Applications for Targeted Relief from its Carrier of Last Resort Obligation and Relinquish its Eligible Telecommunications Carrier Designation (A.23-03-003 and A.23-03-002)

AT&T's application regarding Carrier of Last Resort Obligations (A.23-03-003)

In this application, AT&T requests to be relieved of its Carrier of Last Resort (COLR) obligations in certain areas of California. If approved, it would no longer be required to offer landline telephone service where it is currently required to offer Basic Service in those areas. Basic Service includes nine service elements such as Lifeline rates for eligible customers, free access to 9-1-1, Telephone Relay Service, and directory and operator services. More information on Basic Service is available at <https://www.cpuc.ca.gov/industries-and-topics/internet-and-phone/broadband-mapping-program/broadband-public-feedback/basic-service-definition>.

What is a Carrier of Last Resort (COLR)? A COLR is a telecommunications service provider that stands ready to provide basic telephone service, commonly landline telephone service, to any customer requesting such service within a specified area. At least one telephone company in a specified area is legally required to provide access to telephone service to anyone in its service territory who requests it. This is known as the Carrier of Last Resort (COLR) obligation which ensures that everyone in California has access to safe, reliable, and affordable telephone service. AT&T is the designated COLR in many parts of the state and is the largest COLR in California. Where AT&T is the default landline telephone service provider means that the company must provide traditional landline telephone service to any potential customer in that service territory. AT&T is proposing to withdraw as the COLR in your area without a new carrier being designated as a COLR.

What areas are impacted by AT&T's request to withdraw as a COLR? [Here](#) is the list of census designated places where AT&T is requesting to withdraw as the designated COLR and [here](#) is an online version of the map with address lookup.

What might happen if AT&T withdraws as a COLR? An area without a COLR could mean that there would be no landline telephone company serving that area and that there could possibly be no landline telephone access for customers in that area. If AT&T's proposal were accepted as set forth in its application, then no COLR would be required to provide basic service in your area. This does not necessarily mean that no carriers would, in fact, provide service in your area—only that they would not be required to do so. Other outcomes are possible, such as another carrier besides AT&T volunteering to become the COLR in your area, or the CPUC denying AT&T's proposal.

AT&T's application regarding Eligible Telecommunication Carrier Designation (A.23-03-002)

On March 3, 2023, AT&T requested to give up its designation as an Eligible Telecommunications Carrier (ETC).

What is an ETC? An ETC is a telephone company operating in a specific geographic area, that receives financial assistance from the federal government-established Universal Service Fund to provide high quality, and affordable telephone service to customers at all income levels in specific geographic areas. One example of a program funded by the Universal Service Fund is federal Lifeline. While funding for this program is provided by the federal government, each state determines a telephone company's eligibility for ETC designation. In California, a company's eligibility for these federal funds is determined by the CPUC.

Does an ETC provide California LifeLine? In California, the CPUC also approves and denies applications for state funding for programs to provide universal support, including California LifeLine (California's program is called LifeLine with a capital "L" for "Line"). The California LifeLine program is separate from the federal Lifeline program. An ETC may be a provider of California LifeLine as well as federal Lifeline, but eligibility to provide California LifeLine is not limited to only ETC providers.

What is AT&T's request in this application? AT&T is applying to give up its ETC designation, which would allow it to no longer offer federal Lifeline, as well as other federal programs designed to subsidize telecommunications support for low-income individuals and individuals located in remote areas. AT&T's participation in the California LifeLine program is a separate matter from this application to give up its ETC designation. AT&T asserts that it is not necessary to keep its ETC designation because it no longer receives any federal high-cost support from the federal government to provide universal service. By relinquishing its ETC designation, AT&T will no longer be eligible to receive federal support to provide Lifeline, which could potentially affect all current AT&T Lifeline customers.

What areas are impacted by AT&T's request to give up its ETC designation? All areas of AT&T's service territory where it currently holds ETC designation, which is the same as its Carrier of Last Resort (COLR) service territory, could be impacted if the CPUC approves AT&T's application. Here is a map of the different COLR service territories in California, including AT&T's: https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/communication-division/documents/high-cost-support-and-surcharges/chcf-a-1/ilec-territories-2023_230412.pdf

What are the potential impacts on customers' bills? For a household receiving federal Lifeline from AT&T, the bill could increase by \$5.25 per month for voice-only service, or \$9.25 per month for bundled or internet service. In addition to these amounts, a household on Tribal lands receiving federal Lifeline from AT&T could experience an additional \$25 per month bill increase.

What is required of AT&T for the CPUC to approve AT&T's request? AT&T must demonstrate that another ETC provider can provide universal support in the areas where AT&T wishes to surrender its ETC designation.
