One of the crashes involved a fatality, three crashes had injuries, and nine crashes were property damage only. Of those crashes, one involved a hit and run driver and one was due to DUI.

General Information

For this reporting period, crashes were caused by unsafe speed for conditions, unsafe turning movements, unsafe lane changes, and DUI.

For crashes, injuries are described as minor, moderate, or major. Most crashes with injuries involve minor injuries such as complaint of pain or minor abrasions and lacerations.

Traffic tends to slow down and backup on US-101 southbound between Lost Hills Road and LA City limits.

The Wallis Annenberg Wildlife Crossing Project has not had a significant impact on traffic in the area.
