

Notes:

- Oak Tree Site Map provided for reference only in accordance with the arborist report provided by Juan Carlos Farias, of Nature's Finest Arbor Service, on May 31, 2024. All information to be verified by the arborist of record and city arborist.
- Tree #1, denoted with an "O" to be removed and proposed tree location to be provided as an addendum to this exhibit.
- Tree #2, denoted with an "X" to be protected in place with protective fencing located outside of 5' from the approximate dripline installed prior to commencement of construction
- Protective Fencing shall be a five-foot high chain link fence set in concrete footings with posts installed every eight feet, two feet deep.
- Tree #2 shall be irrigated prior to, and after, the installation of the privacy fence to provide a deep soaking beneath the tree's drip lines, but not within approximately four feet of their trunks.
- An ISA Certified Consulting Arborist shall be on-site during all site construction activities in or around the protection zone of tree #2.
- Information on the replacement tree for tree #1 shall be provided in separate documentation.
